Press Release

February 2008

Manacomm to Supply Harvey Norman OFIS

Manacomm Australia's favourite software publisher has been selected as a preferred software supplier of choice for Harvey Norman OFIS when the new OFIS retail stores are launched in late March.

Manacomm distinguishes itself within the publishing software industry through an exceptional product range, accurate reaction to market forces, prioritising customer service management, and a specialist knowledge of the industry obtained over 20 years.

Harvey Norman OFIS General Manager Paul English believes Manacomm is one of the few software publishers in Australia with the capability to produce custom software products for the reseller network, enabling innovation in all aspects of production and distribution.

"Manacomm has been a long and trusted supplier to Harvey Norman" Mr English said.

"When any new business venture is launched you look to those partners that are going to provide you the necessary support"

"We are very excited to have Manacomm as a preferred supplier to Harvey Norman OFIS and our entire team is looking forward to continuing our strong relationship with Manacomm" Mr. English said.

A key contributor to the rapid growth sustained by Manacomm can be attributed to its software supply agreement with Trend Micro and its distribution relationship with major retailers including Harvey Norman.

According to Manacomm CEO James Mackay, a key component of the success sustained by Manacomm during the past decade can be attributed to the relationships it has developed with retailers over the years.

"We recognise that building mutually beneficial relationships is paramount to our business structure and method of operation" Mr. Mackay said.

"We are continually seeking ways to meet the needs of our reseller partners, and are delighted to be supplying the new Harvey Norman OFIS stores".

Manacomm has been the recipient of the Harvey Norman Software Supplier of The Year since 2005.

"Manacomm is honoured to be the Software Supplier of The Year and we'll work hard to continue our great relationship with the Harvey Norman group" Mr. Mackay said.

Manacomm's range includes popular software titles such as Trend Micro Internet Security, Acronis True Image, Nitro PDF Professional, ZoneAlarm and Net Nanny.
