Q1 FY2021 TRADING UPDATE

Jumbo provides Q1 FY21 trading update

Jumbo CEO Mike Veverka has provided a trading update for the first quarter of the 2021 financial year, ending 30 September, at the company's virtual Annual General Meeting (AGM).

"In the opening quarter, when large jackpots were down 38% on the pcg and the peak jackpot reached \$80m compared to the record \$150m jackpot a year ago, I am pleased to announce a significant improvement in Jumbo's underlying performance, including in our key lotteries business, where like-for-like sales increased by between 26% and 64%. This contributed to a group revenue result which was down just 2% on the pcg and demonstrates our superior ability to continue to deliver engaging and entertaining experiences to our customers.

I especially call out the 80bp lift in group margins of revenue to TTV, from 19.8%, to 20.6%, which not only demonstrates our commitment to maintaining a disciplined operating performance across the group as a whole, but also highlights the positive contribution of our new businesses, including our Gatherwell and Powered by Jumbo SaaS. Some of the highlights of our performance are identified below".

Strong underlying growth demonstrated by:

- 36% increase over 12 months in sales from jackpots under \$15m
- 26% increase over 4 months in sales of \$80m Powerball (July 2020 compared to March 2020)
